#### 4. Playing Black Jack

##### A. GAME RULES

- You compete against the dealer to win each game.
- You start the game with 2 cards. You "HIT" to receive another card, or "STAND" to declare your total.
- The total is the value of all your cards, with the goal being to beat the dealer.
- You "BUST" when your total goes over 21 after a "HIT".
- You win if your total is higher than the dealer, and you don't "BUST"!
- If your total is identical to the dealer, then the game is a "PUSH" and your bet is returned.

- You start out with 300 credits. If you should run out, they will be refilled automatically.

## B. CARD VALUES

- Numbered cards are worth the value marked.
- Face cards (J, Q, K) are worth 10 points each.
- Aces (A) are worth 1 or 11 points, depending on the situation.

## C. SCORING

- NORMAL: If you beat the dealer, you win twice your original bet (1 to 1).
- BLACKJACK: If you have 21 by a combination of an Ace and a face card, you win 2.5x your bet (2 to 3).

## D. COMMANDS

- HIT: Receive another card.
- STAND: Stop and declare your total.
- DOUBLE DOWN: Double your bet, "HIT", and then "STAND" (risky!).
- SPLIT: If you start with 2 cards that are the same value, you can choose to play each separately.
- INSURANCE: If the dealer is showing an Ace, then you can issue a challenge. If the dealer has BLACKJACK, then you get back your original bet (win!). Otherwise, you lose an additional half of your original bet, and the game continues as normal (lose!).

## E. SPECIAL RULES

- SOFT 17: The dealer normally must "HIT" while less than 17, and must "STAND" otherwise. However, when the dealer has 17 with an Ace valued at 11, then they must "HIT" in this special case.
- DOUBLE DECK: Two full decks of cards are used for play. Once the remaining cards get below a certain total, all unused cards are collected and the deck reshuffled.
- You cannot "DOUBLE DOWN" after a "SPLIT".
- You cannot "SPLIT" more than once per game.
- Splitting with Aces forces you to "HIT" on each one.

## 5. Playing Video Poker

### A. GAME RULES

- All Video Poker game variations are based on 5-Card Draw Poker.
- You are dealt 5 cards when you start.
- Your goal is to have a Poker hand that pays out from the played game variation.
- You have one chance to drop up to all of your cards in order to make the best hand.
- If the resulting hand is high enough, you win and get a payout! Each hand has its own value, with different bonuses depending upon the game variation.
